### INTERNATIONAL PRELIMINARY **EXAMINATION REPORT**

International application No.

PCT/GB 03/05613

	D:-		_
ı.	basis	of the	report

1. With regard to the elements of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)): **Description, Pages** 1-136 as originally filed Claims, Numbers 1-20 as originally filed 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language:

	ın	the language of a translation furnished for the purposes of the international search (under Rule 23.1 □ the language).					
		the language of publication of the international application (under Rule 48.3(b)).					
		the language of a t Rule 55.2 and/or 55	anslation furnished for the purposes of international analysis and				
3.	. Wi inte	th regard to any <b>nucleotide</b> and/or amino acid sequence disclosed in the international application, the ernational preliminary examination was carried out on the basis of the sequence listing:					
		contained in the international application in written form.					
		<ul> <li>filed together with the international application in computer readable form.</li> <li>furnished subsequently to this Authority in written form.</li> <li>furnished subsequently to this Authority in computer readable form.</li> </ul>					
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.					
		The statement that listing has been furn	he information recorded in computer readable form is identical to the written sequence ished.				
4.	The	amendments have r	esulted in the cancellation of:				
		the description,	pages:				
		the claims,	Nos.:				
		the drawings,	sheets:				
5. 🗆		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).					
		(Any replacement sh	eet containing such amendments must be referred to under item 1 and annexed to this				

6. Additional observations, if necessary:

2.	Citati	ons and explanations						

see separate sheet

### Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 18,19 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

#### Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The following documents cited in the search report are referred to in this communication;

D1: WO-A-03055491 D2: WO-A-0200649 D3: WO-A-03000188

D1 and D3 were published after the priority date of the present application, and will not be taken into consideration for this written opinion.

With regard to the requirement for novelty (Article 33(2) of the PCT), the compounds of the present application are novel with respect to D2 on account of the phosphonooxy group that is always present in the group Z. Article 33(2) of the PCT thus appears to have been satisfied.

With regard to the requirement for inventive step (Article 33(3) of the PCT), the compounds of the present application are described as being useful in the treatment of certain proliferative diseases due to their inhibition of Aurora kinases. Document D2 discloses compounds which inhibit aurora 2 kinase, but it cannot be said with any degree of accuracy that the man skilled in the art, faced with the problem of providing further novel quinazoline derivatives with the desired qualitative activity would have been unambiguously led from D2 to prepare the compounds of the present application. Thus, on the assumption that all the compounds falling within the scope of claim 1

# INTERNATIONAL PRELIMINARY International application No. PCT/GB 03/05613 EXAMINATION REPORT - SEPARATE SHEET

provide a solution to the problem, Article 33(3) of the PCT could be considered to have been satisfied re D2.

For the assessment of the present claims 18,19 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
